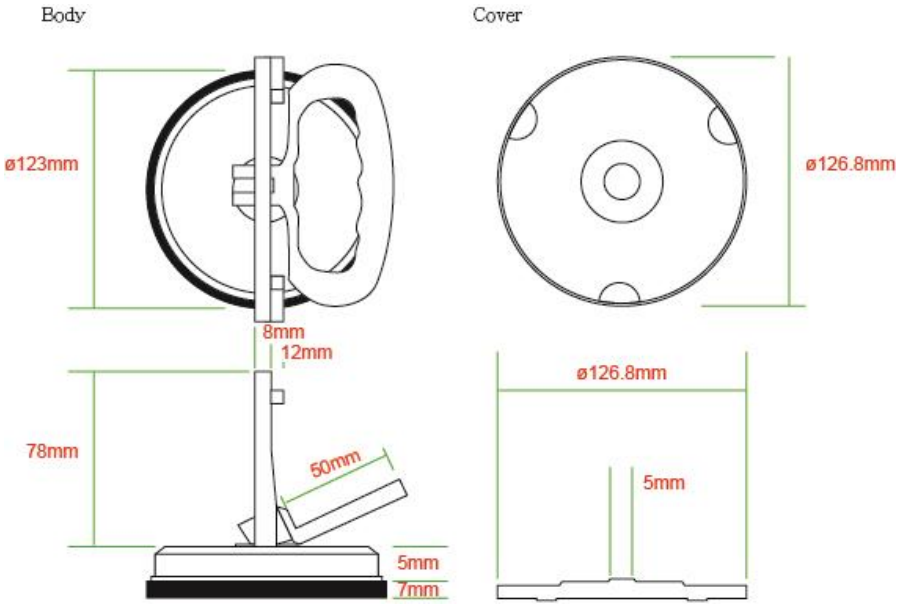
## Suction Lifters

# Single Suction Cup (Aluminium)

RS Stock No. 285-361

**Specifications:**


- Suction lifters are hand tools and must not to be used in connection with cranes or other lifting devices.
- Before each use, make sure the suction pad is smooth, clean, undamaged and without any cracks.
- Clean suction pads regularly with spirit or other non-aggressive cleaners.
- Make sure the surface / object to be lifted is of non-porous material.
- In addition, the surface must be clean, dry and free of oils and grease.
- On rough or porous surfaces, the holding capacity decreases or is non-existent.
- Do not use any sharp objects to loosen the suction lifters from the surface as this will damage the suction pad.
